FREE COURSE: PRACTICAL MATH

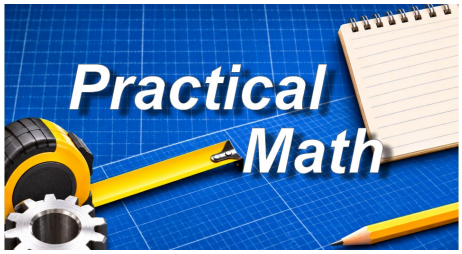
Math for Manufacturing and the Trades

Build your math skills. Learn at your own pace.

Need a refresher on basic math? Practical Math is a series of short, easy-to-follow lessons that help you understand and use math in everyday situations, manufacturing, and technical trades.

What You'll Learn

- Understand numbers and units of measurement
- Add, subtract, multiply, and divide with units
- Work with fractions, decimals, and percentages
- Read rulers and measuring tapes
- Solve practical measurement problems



Earn a Certificate and Digital Badge

Developed with input from local employers to emphasize practical workplace skills, this course offers learners the opportunity to earn a **Certificate of Proficiency and a digital badge** recognizing their achievement.
